Software Engineer, BA in Computer Sciences with an speciality in Computer Graphics. Wants to contribute making great games. I love developing game mechanics, new features, watching user feedback, breaking down complex technical issues and learning new things.

Technical Skills

Programming / Markup Languages: C++, C#, C, JavaScript, TypeScript, HTML, CSS.

Development Tools: Git, SVN, Visual Studio, Visual Studio Code, Resharper.

APIs, Libraries & Game Engines: Unity3D, OpenGL/GLSL, STL, WPF, NodeJS, Electron, Angular.

Languages

Spanish: Native.

English: Fluent.

Experience

Professional.....

Unity3D, C# Programmer

Globant

Santiago, Chile

Mar. 2020–Present (6 mos)

Worked with multiple clients, Aristocrat, Facebook & Oculus, for different software solutions using Unity, understanding many complex codebases and abstract ideas, adapting Unity to work with other frameworks.

Unity3D, C# Programmer

Gamaga, Ltd

Santiago, Chile

Jul. 2017–Mar. 2020 (2 yrs 9 mos)

Worked on multiple games, specially Operate Now : Hospital (LiveOps), implementing complex technical features, integrating new content, bug fixing, and developing external tools. Also learnt leading skills, assigning and splitting tasks for others programmers, working on estimations, desired implementations, optimal architectures and standards for the team.

C, C++ Programmer (Remote)

NCH Software

USA-Venezuela

May. 2017–Jul. 2017 (3 mos)

Maintaining, improving and adding functionalities over audio and invoice management software.

Unity3D, C# Game Developer (Remote)

LearnSafari

Australia-Venezuela

Nov. 2015–Nov. 2016 (1 yr 2 mos)

Level design, game logic and mechanics development for the game Learn Safari from scratch. Learn Safari is a educational game meant to teach children Spanish through different lessons with many interactive games and narrative.

Internship.....

Game Development General Laboratory

UCV, Computer Graphics Center

Caracas, Venezuela, Prof. Esmitt Ramírez

Apr. 2015–Aug. 2015 (5 mos)

Writing, researching and developing theoretical and practical material for a general laboratory on game development using Unity3D.

Vocational.....

Teacher Assistant, Operative Systems

UCV, Faculty of Sciences

Caracas, Venezuela, Prof. Robinson Rivas

Mar. 2012–Jul. 2012 (5 mos)

Lecturing laboratories on operative system using the C programming language, system instructions and shell commands, use of threads and processes, file systems and parallel programming.

Education

Licentiate Degree in Computer Science, Faculty of Sciences

Central University of Venezuela (UCV), Graduated with Honors

Minor: Computer Graphics.

Caracas, Paseo Los Ilustres

2009–2016

Master Thesis

Voxel Shading and Cone Tracing for Global Illumination [↗](#)

Prof. Esmitt Ramírez, *Faculty of Sciences, Computer Science Department, Computer Graphics Center*

A real-time dynamic global illumination approach based on cone tracing for emissive, diffuse and specular surfaces utilizing voxel shading and compute shaders. Per-review paper published for the 2016 XLII Latin American Computing Conference. [↗](#)

Events & Conferences

Caracas - Venezuela | Global GameJam 2016: A 48 hours game jam global event. Collaborated in the game "The Haunt" [↗](#) using Unity3D. I worked on the game design, level design, characters movement and interactions. The Haunt is a tag-like game, where the players start as werewolves and they have to find and touch a human to transform into humans, once they transform the objective is to stay human as long as possible using the environment.

Caracas - Venezuela | Global GameJam 2015: Collaborated in the game "Kidz Solution" [↗](#) using Unity3D along with many teammates on different roles. I worked on the game concept, artificial intelligence, interface and game mechanics. In Kidz Solutions kids have to save adults from different enemies in a post-apocalyptic world.

Caracas - Venezuela | 5th JOINCIC 2012: A computer science conference with many talks and courses of different topics on computer science such as web development, game development, robotics, parallel computing, data processing, etc.

Caracas - Venezuela | CEIDEC 2012 - UCV GameDev Contest: A scientific research and development conference with a broad range of talks from different areas such as maths, physics, biology and computer science. Developed the game "Hybris" [↗](#) using Unity3D along with many teammates on different roles for the GameDev Contest, I worked mostly on artificial intelligence and game mechanics. Hibris is a god game where the player has to save humanity from imminent doom using different powers.

Hobbies & Interests

TV / Animated Series: I enjoy watching comedies, documentaries, mystery shows, comics, dramas, a bit of anime.

Gaming: I work with gaming but of course I also enjoy playing video games, mostly casual games on PC or Consoles, some mobile games too. I also sometimes like to learn the game mechanics and deconstruct or think how some of them were implemented. Working on games has kinda changed the experience of playing them.

Science Journals: Coming from a scientific background in college I enjoy dwelling in the latests news about science in general, specially computer graphics, artificial intelligence, physics and biology.
