Game Developer, BA in Computer Science with a specialization in Computer Graphics. Core strengths include: gameplay, UI/UX & graphics programming, breaking down tasks and creating an efficient & collaborative development pipeline. Motivated and eager to learn from others and share my own experience.

Technical Skills

Languages: C#, C++, C, Shaders, JavaScript, Python, Objective-C, Java, Shell Script, HTML, CSS.

Tech Stack: Unity3D, Addressables, Zenject, UniRX, UniTask, Unity DOTS, Timeline, SOLID, TDD.

Tools: Git, Rider, Xcode, Copilot, Claude, CI/CD, Notion, Figma, Firebase, SVN, AWS.

Experience

Professional

Senior Game Developer, C# & Unity3D — **Metacore**
Berlin, Germany (Hybrid) — *Aug. 2025–Oct. 2026 (1 yr 2 mos)*

- Contributed to new events, tools, test framework & modernization of the existing codebase for Merge Mansion.
- Developed AI-assisted engineering practices using LLMs for architecture craft, context harnessing & feature work.

Lead & Senior Game Developer, C# & Unity3D — **Globant**
Santiago, Chile (Hybrid) — *Mar. 2020–Jan. 2024 (3 yrs 11 mos)*

- Led Hasbro's *Power Rangers: Morphin Legends* to ship in 2 years; collaborated on ABinBev's *Reign Of Titans*.
- Development of complex battle systems, rendering solutions, CI/CD pipeline, live content (Addressables), MVPs.
- Unity SDK development, calibration software and consulting for clients: *Big Fish*, *Oculus* and *Aristocrat*

Game Developer, C# & Unity3D — **Gamaga, Ltd**
Santiago, Chile (On-site) — *Jul. 2017–Mar. 2020 (2 yrs 9 mos)*

- Collaborated with the games: *Operate Now*, *Holly's Home Design*, *Banana Kong* and *Red Crimes*
- Development of features that led to major KPIs growth, from FTUE improvements to late game content.
- Learnt LiveOps, leadership & mentoring, SDK integration, analytics, optimization & CI/CD.

Junior Game Developer, C# & Unity3D — **LearnSafari**
Melbourne, Australia (Remote) — *Sep. 2015–Nov. 2016 (1 yr 2 mos)*

- Built gameplay, quest, narrative & UI/UX systems for *Learn Safari*, a children's Spanish-learning game.

Internship

Game Development Laboratory Researcher — **UCV, Computer Graphics Center**
Caracas, Venezuela (On-site), Prof. Esmitt Ramírez — *Apr. 2015–Aug. 2015 (6 mos)*

- Development & research on practical material for a game development laboratory using Unity3D within the faculty.

Vocational

Teacher Assistant, Operative Systems — **UCV, Faculty of Sciences**
Caracas, Venezuela (On-site), Prof. Robinson Rivas — *Mar. 2012–Jul. 2012 (6 mos)*

- Lectures on the Operative Systems laboratory course using C, Shell Script and Assembly x86 programming.
- Tutoring on system calls & shell commands, usage of threads & processes, file systems & parallel programming.

Education

Licentiate Degree in Computer Science, Faculty of Sciences — **Caracas, Paseo Los Ilustres**
Central University of Venezuela (UCV), Graduated with Honors — *2009–2016*
Specialization: Computer Graphics.

Languages

English: Fluent.

Spanish: Native.

Publications

Voxel Shading and Cone Tracing for Global Illumination

Prof. Esmitt Ramírez, *Faculty of Sciences, Computer Science Department, Computer Graphics Center*

A real-time dynamic global illumination approach based on cone tracing for emissive, diffuse and specular surfaces utilizing voxel shading and compute shaders. Per-review paper published for the 2016 XLII Latin American Computing Conference.

Game Jams

Venezuela & Germany | **Global GameJam 2015, 2016, 2017, 2018, 2025**: A game jam global event where you have to make a game in 48 hours. I collaborated on the design of mechanics and development of these games: "Kidz Solution", "The Haunt", "Echo Switch", "Emission" and "Bubble Salvage"

Venezuela | **CEIDEC 2012 - UCV GameDev Contest**: A scientific research and development conference with a broad range of talks from different areas. Developed the game "Hybris" using Unity3D along with college teammates for the GameDev Contest. Hybris is a god game where the player has to save humanity from imminent doom using different powers.
